

All access options

Access Maximizer CRM when and where you need it

Optimise productivity and increase profitability

To work effectively and stay ahead of your competitors in today's demanding business environment requires a flexible and convenient CRM solution that delivers essential information and tools to suit where and how your staff work. Whether working in the office, from home, remote offices or on the road, Maximizer CRM All Access licencing provides a variety of options in one all-inclusive licence. All Access enables you and your team to work productively and effectively, to deliver the levels of sales, marketing and customer service required to build relationships that drive revenue.

Available in Your Cloud - internally on your cloud server, hosted by a third party data centre or by one of Maximizer's Global Certified Solution Providers, or alternatively in Our Cloud, via our Maximizer CRM Live solution, accessible on your mobile on your mobile smartphone or tablet, Maximizer CRM offers unparalleled access in one value-packed solution and brings critical information to you – wherever, whenever and however you do business with no need to install software on each user's desktop!

Powerful and intuitive cloud CRM

Maximizer CRM installed on your cloud or in our cloud provides your customer-facing staff with the critical information and tools they need to provide excellent service for customers and prospects to close more deals. With your central corporate CRM database of customer

information available via a secure web access link maintained on-premise, the powerful suite of built-in tools provided by Maximizer CRM are enabled on your desktops through wired or wireless network access, laptop, mobile, any web-enabled device, empowering your teams to:

- Empower your remote workforce and enable strategic collaboration with access to critical information by logging into a secure web interface, anywhere, anytime
- Provide full access to accounts, leads, sales opportunities, notes, custom fields, calendars, tasks, and customer service cases
- Manage appointments, tasks and a series of standard processes with action plans to organise projects and systematically schedule follow-up activities
- Manage data quality: find and combine duplicate records
- Manage security using the new Auditing tool, which logs all information about data changes to help track internal security breaches and intrusions, creating a trail of information over time, showing what changes have been made, when and by whom for maximum cloud security
- Modify and create User Defined Fields (UDFs) customised to your business processes for easy search functionality
- Access and update customer and lead information, sales opportunities, customer service cases, marketing campaigns, documents, calendar appointments,

Key Features:
